UTILITY SERVICES

Plant valves never fail at convenient times. Why is that? Because there is never a convenient time for your pressure to spike, or your tanks to overflow. That's why yearly inspection and maintenance of your valves is key to ensuring that your valves are operating how you intend for them to operate. RMS Utility Service's Annual Maintenance Plan includes the recommended yearly maintenance and inspection for your valves and our **24/7 Emergency Call Out Support** - All included in your yearly rate!

- 1.) Catalog: Inventory of new and existing valves, data collection on OEM parts and serial numbers
- 2.) Testing: External Analysis and clean up of valve body, bolts & nuts.
- 3.) Range of Motion Evaluation. Includes diagnosis of any range of motion issues
- 4.) Internal & Functionality Analysis: We will test the valve to make sure it is doing what it is intended to do. Make any minor adjustments necessary.
- 5.) Rebuild pilot controls and clean pilot system, strainers
- 6.) Provide detailed maintenance report for your records

This plan includes our 24/7 Emergency Onsite Support!
